04
Select your **Trade Size**

- **Fixed size** = all copy trades are fixed to one trade size
- **Mirror master size** = all trades will be the same size as the Signal irrespective of account size
- **Proportional by equity** = trade size is proportional to account equity. Copier can reduce or amplify their exposure to the size of trades

05
Select round up to minimum trade size this ensures no trades are missed (optional)

06
Select copy existing trades this ensures any open trades will be copied (optional)

07
Select **Agree and Copy**

- Indicates whether there is a fee
- Link to FAQ's

Troubleshooting:

1. Fixed size example - a user selects 0.5 lots, all copy trades will be fixed to 0.5 lots
2. Mirror master size example - Signal places a trade at 0.3 lots, copier places a copy trade at 0.3 lots despite having a smaller account
3. Mirror master risk example - Signal ($10,000 account), copier ($1,000 account). The account size difference is 1/10th the size of signal. The signal places a trade at 1 lot (if proportionality set to 1), the copier will mirror the trade at 0.1 lot, which is 1/10th the size of the signals trade.
